

Title: *LinkedIn Content Audit & Content Ideation Report Plastics For Change*

Submitted By: Mehul Deshmukh

Date : 24 June 2026

Position Applied: Social Media/Content Intern

About the Brand

Plastics For Change is a social enterprise focused on creating ethical recycling supply chains while improving the livelihoods of waste collectors.

LinkedIn Presence Snapshot

Followers: 36,180+

Industry: Sustainability & Recycling

Content Mix: Carousels, Videos, Event Updates, Educational Posts

Primary Audience: Brands, Sustainability Professionals, Packaging Industry Leaders

Initial Observation: Plastics For Change primarily uses educational, impact-driven, and event-focused content to position itself as a thought leader in sustainable recycling and circular economy solutions.

Post Topic	Format (Carousel/Video/Text)	Estimated Engagement	Your Observation
AmericaPack Summit Day 1 Panel Discussion	Carousel	Medium	Leadership-focused event content strengthens brand credibility but appeals to a niche audience.
AmericaPack Summit Day 1 Live Update	Video	Medium	Live event videos add authenticity and create a stronger human connection.
AmericaPack Summit Speaker Announcement	Static Graphic	Low-Medium	Informative content but highly promotional posts generally receive lower engagement.
WFTO Founder Quote Feature	Static Image	Low	Reinforces brand values but lacks interactive elements that encourage engagement.
Kolkata Recycling Centre Showcase	Carousel	High	Behind-the-scenes operational content builds trust and demonstrates real-world impact.

GCPRS Event Promotion	Static Graphic	Medium	Industry event participation supports thought leadership but feels promotional.
Day in the Life of a Waste Collector	Video	High	Human stories create emotional connection and generate stronger audience interaction.
Recycled Plastic Traceability Explained	Carousel	Medium-High	Educational content positions the brand as a knowledgeable industry leader.
Monsoon Products Made from Recycled Plastic	Carousel	Medium-High	Practical use cases help audiences understand the value of recycled materials.
Circular Impact Weekly Newsletter Promotion	Graphic + Article	Low-Medium	Valuable information but indirect promotional content receives lower engagement.

Key Findings

What's Working

- Human-centered storytelling generates the highest engagement.
- Educational carousel posts establish thought leadership.
- Behind-the-scenes content improves trust and transparency.

What's Not Working

- Event promotions receive lower engagement than impact-focused content.
- Quote graphics generate limited interaction.
- Some posts focus more on promotion than audience value.

Initial Observation

Plastics For Change performs best when it combines impact storytelling, educational insights, and operational transparency. Posts that showcase people and real-world outcomes consistently outperform purely promotional content.

Task 2 – Content Idea

Brand Chosen

Duolingo

Why I Chose This Brand

Duolingo stands out because it transforms educational content into engaging stories. Instead of directly promoting its product, the brand focuses on creating content that is relatable, entertaining, and easy to share. This approach helps build strong audience engagement and brand recall.

Content Idea Inspired by Duolingo

Campaign Title

“The Journey of a Plastic Bottle”

Format

Instagram/LinkedIn Carousel (7 Slides)

Description

This carousel would tell the complete story of a plastic bottle after it is discarded. Rather than focusing only on recycling, it would highlight the people behind the process—from waste collectors and sorting centres to recyclers and brands that use recycled plastic.

The content would use simple storytelling, visuals, and real-world impact data to make the recycling journey easy to understand. The tone would be educational, human-centered, and optimistic while reinforcing Plastics For Change's mission of creating ethical and traceable recycling supply chains.

Why This Idea Would Work

- Uses storytelling instead of direct promotion.
- Humanizes the recycling process.
- Highlights the social impact behind recycling.
- Makes a complex supply chain easy to understand.
- Encourages engagement through curiosity and visual storytelling.

Mockup Concept:

A clean blue-and-white carousel using Plastics For Change branding. Each slide follows the bottle's journey with real photos from collection centres and waste collectors, ending with measurable environmental and social impact.

Conclusion

Through this analysis, I observed that human-centered storytelling and educational content consistently outperform promotional content. The proposed content idea builds on these insights by combining storytelling, impact, and traceability in a format designed for LinkedIn engagement. This recommendation aligns with Plastics For Change's mission while creating a content format that is educational, engaging, and shareable.
